

Preferred Systems

HERE'S WHAT THE EXPERTS ARE SAYING ABOUT PSI...

"Folks, this is good stuff, and if you're considering moving to NetWare 4.x, you should use DS Standard before you start. DS Standard will be invaluable for anyone even thinking about implementing NDS." - Jamie Lewis, PC WEEK

"...DS Standard may become the No.1 tool in your NetWare 4.x toolbox." - William Wong, LAN TIMES

"If you are a potential or existing NetWare 4 user, DS Standard from Preferred Systems, Inc. could change your life." - Bob Walder, Network Computing U.K.

"DS Standard provides a solid tool for planning a NetWare 4.x network... Its ability to model NDS implementation before installation and to automate installation based on that model will save users time and money." - Jamie Lewis, President, The Burton Group (News Analysis)

"...in the right place, at the right time, with the right approach." - PC WEEK, Cover Story

"DS Standard includes a collection of on-line documentation, tutorial, and technical information called "The Assistant" that by itself is worth the price of entry for the wealth of useful NDS design and implementation data it contains." - Ed Tittel & Deni Connor, NetWare for Dummies

"...[DS Standard] is an indispensable tool that makes NDS directory tree management a breeze." - David P. Chernicoff, PC WEEK

"For many, DS Standard could be the product which is likely to make the difference between existing NetWare 3.x users switching to Windows NT or following the Novell path to version 4.x. Are you listening, Mr. Gates?" - Steve Broadhead, PCLAN U.K.

"I thought that building my NDS tree and bringing up the first NetWare 4 server was going to take me Saturday and Sunday. Using DS Standard, I was done in four hours on Saturday morning." - Art Mafale, ITT-Hartford

"The on-line help provided by DS Standard (The Assistant) is one of the best help engines I have ever used. Whatever your needs are for NetWare 4.1, DS Standard is the tool to use."
- Art Lamb, Boston Network Users Group
